Introducing SEQRITE HawkkScan

SEQRITE HawkkScan is a data privacy management platform that empowers your organization to manage data privacy requirements across locations. The platform provides the ability to find sensitive and critical data spread across your organization's data landscape. It enables you to classify and label this data to suit your business and privacy compliance requirements. HawkkScan lets you manage the subject profiles and subject rights requests.

Starting your data privacy journey with HawkkScan:

- Get visibility into the different data and data sources present across your organization's data and entities perimeter.
- Auto-classify discovered data using pre-built or custom classifiers.
- Channel multi-level workflows to ensure appropriate handling of data across the organization.

What's New

SEQRITE HawkkScan includes the following new features.

Data Classification on Endpoints

Discover and classify sensitive data stored on windows Endpoints (client and server OS) by users through HawkkScan.

Data Summary Reports

Get an accurate view of the organization's sensitive data and data labels mapped to it. Configure various queries and get the data summary result based on applied filters.

Data Classification through OCR for Images

Leverage advanced Machine Learning-based OCR to perform text extraction from images stored on endpoints for data classification.

HawkkScan Agent and Device Management

Keep a track of device inventory where HawkkScan Agent is installed. The Agent helps you do the data classification on endpoints.

Known Issues

Some of the important known issues in version 1.9.0 are as follows.

- MS Teams displays incorrect data on 'Verify Classification > Sample Data' section.
- MySQL, MSSQL & Oracle data sources are displayed with 'reindexing failed' status once scan is completed.

Technical Support

SEQRITE provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
