Introducing Seqrite Endpoint Security Cloud

Seqrite Cloud is an integrated solution that allows the management and regulation of multiple Endpoint Security products deployed at different geographical locations. IT administrators from any location can easily connect to the cloud to view the latest security status, configure product policies, receive notifications and rectify critical network events from one single dashboard. It also facilitates policy configuration, backup and more on the cloud for Seqrite products.

Available flavors

Seqrite Endpoint Security Cloud is available in the following flavors:

New Features and Enhancements

Seqrite EPS

- On the Client Status page, you can view the name of the group to which the client belongs. The exported reports also show the group details.
- In the browser title, site names of all the open sites are displayed in the respective tabs.
- The customers will receive mails in the text format.
- If the activation link expires or user does not receive the Email, you can resend the activation link. For the User Roles, Administrator and Report Viewer, an Email with activation link can be sent to the Email address provided.
- SNMP enhancements
- GDPR consent on the EULA page
- For virus scan, you can exclude files by using wildcards.
- If you start deploying Cloud client on the endpoints which already has on-premises EPS client, the on-premises client will be uninstalled, and Seqrite Endpoint Security Cloud client will be installed on the endpoint.
- New OS support for client
 - Mac OS X 10.14
 - Amazon Linux 2
- Email notifications Enhancements,
 - Virus detected on endpoints
 - Virus active on endpoint
 - Virus outbreak and virus detection in network
 - Reboot required on any endpoint
 - Console login URL in Emails

MSSP

- GDPR consent on the EULA page
- Email Notifications Enhancements:
 - Console login URL in Emails
 - Emails in text format

Known Issues

SQUEM-17481 : File is not getting excluded from scanning on MAC client if it is present in any of archive(.zip) type and that file name is added into the exclusion list
