Revision History

The information in this document is provided for the sole use of Quick Heal Research and Development, Incidence Response and Support Team. It is strictly forbidden to publish or distribute any part of this document to any other party.

Version	Date	Comment
UTM2.4.1	13 April 2020	Version 2.4.1 GA Release

Build Information

Build 2.4 version released on 13 April 2020

Seqrite UTM GA Build 2.4 details:

Product Name	Release Date	MD5 Checksum	Build Version
Seqrite Unified Threat Management	13 April 2020	NA – online update	Build 2.4.1.7

New Features and Enhancements

1. Captive Portal redirection for HSTS websites

UTM users would be redirected to the login page when trying to access HTTP Strict Transport Security (HSTS) websites. NOTE: Users would have to install the UTM certificate on their browsers.

2. Custom Certificate authority can be used for Proxy Server

Admin can upload a custom Certificate Authority and use that for the proxy server on the UTM.

NOTE: Please check Help section on the UTM for more details for the new features.

Bug Fixes

ID#	Summary of the fixed issue
1	Interface page takes up to 10 seconds to load. This has been fixed.
2	Custom LAN zone users unable to access WAN resources without NAT. This issue has been resolved.
3	UTM admin login page and denied page does not load correctly on Internet Explorer 11. This issue has been resolved.

Known Issues

The following table lists some of the important known issues to consider in version 2.4.

ID#	Summary of known issue
1	Backup file with blank space in filename cannot be uploaded. <i>Workaround:</i> Remove the space from the filename and upload.

Appendix

Installation of UTM version 2.4.1.7

Online System Update

- All devices on 2.4.0.45 will be updated to 2.4.1.7 automatically if automatic updates are enabled.
