Introducing SEQRITE HawkkScan

SEQRITE HawkkScan is a data privacy management platform that empowers your organization to manage data privacy requirements across locations. The platform provides the ability to find sensitive and critical data spread across your organization's data landscape. It enables you to classify and label this data to suit your business and privacy compliance requirements. HawkkScan lets you manage the subject profiles and subject rights requests.

Starting your data privacy journey with HawkkScan:

- Get visibility into the different data and data sources present across your organization's data and entities perimeter.
- Auto-classify discovered data using pre-built or custom classifiers.
- Channel multi-level workflows to ensure appropriate handling of data across the organization.

What's New

SEQRITE HawkScan includes the following new features.

On-Premise Deployment support for Discovery Realm

- Administrator can deploy discovery and analysis realm through an OVA file.

Simplified Onboarding Wizard

- Product onboarding wizard has been simplified for an administrator with different options for discovery realm deployment.

Support for new Data Source Connectors

- Discover and classify sensitive data on Outlook 365 and Vision Help Desk.

Product License Enforcement

- Added enforcement checks for search queries and number of customer classifiers-tags.

Other Features

- Bug Fixes and UI Improvements.

Known Issues

Some of the important known issues in version 1.1 are as follows.

- The SSL option on the data source configuration page for Oracle is not available.
- The breadcrumb text is not getting translated to the selected language across all pages.
- For S3 data source, the user has to scroll more to see the task comments section.

Technical Support

SEQRITE provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
