About SEQRITE HawkEye

With cyber threats constantly evolving, getting smarter, and more sophisticated, it's time you get holistic visibility of security posture in one place to mitigate risks before it becomes a disaster.

SEQRITE HawkEye is a cloud-based platform that will enable coordination between different security layers, integrate cybersecurity silos into a single pane of truth, and ensure your point products communicate with each other to consolidate alerts, identify risks, and convert the data into intelligence.

SEQRITE HawkEye will enable your business to prevent real-time malware breaches, make insight-driven decisions, and accelerate vital security functions quickly and effectively with just a few clicks.

Supported Web Browsers

The following Web browsers are supported for accessing Seqrite HawkEye,

- Microsoft Edge
- Google Chrome 60 and above
- Mozilla Firefox 55 and above
- Safari (Only Mac) 11, 12 and 13

Supported SEQRITE Products

With SEQRITE HawkkEye 2.0, you can manage the following SEQRITE products:

- SEQRITE Endpoint Security (Cloud) with DLP as add-on
- SEQRITE HawkkHunt
- SEQRITE mSuite / Workspace
- SEQRITE HawkkScan
- SEQRITE HawkkProtect

HawkkEye Features/ Enhancements

SEQRITE HawkkEye 2.0 offers the following feature:

- Introduced the option to alternate between Light and Dark theme on the User Interface of the HawkkEye console. Switch the theme with a single click.
- About (HawkkEye) page is included in the console.
- Build Quick Heal's private UI control library with the ability to enhance the control library in the future.
- Enable products to include a control library for developing UI screens.
- Consistent UX across the Quick Heal product portfolio.
- Faster development with readily available controls.
- Upgrade HawkkEye screens using the control library.
- Upgrade HawkkEye angular version from 4 to 12.

Known Issues

- By default, 2FA is enabled for the Super Admin role. There is no option to disable 2FA from UI.

Workaround – 2FA can be disabled from backend support so please contact SEQRITE support.

- In the Japanese and Korean HawkkEye UI, on the Dashboard, in the top 5 Applications and top 5 Users section, some strings appear in English script.

Reason: HawkkProtect sends telemetry information of top 5 Applications and top 5 Users. HawkkProtect supports only the English language. Please note that only EPS Cloud supports Japanese and Korean localization as of today.

Technical Support

SEQRITE provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
